

Fiberdeck®

Never stop innovating

Reliable products designed to last a long time and protect the environment. As our natural resources are limited, we need to conserve and recycle them for future generations.

Our products are made from 95% recycled plastic waste.

Forerunners in many fields, we are constantly on the lookout for new products and solutions to advance sustainability, products and simplify their use.

Fiberdeck®, is a young, dynamic team that shares the same values and favors collaborative work. Respect for everyone involved is our condition for success.

A QUALITY RECOGNIZED

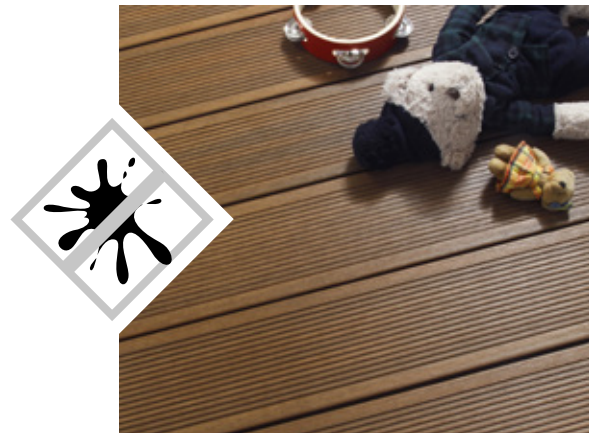

Our range is fully compliant with the European Wood Regulations, EUTR. All our composite wood products are FSC-certified®, which you can recognize by the article text and the corresponding logo.

LONG LIFE SERVICE

A 20-year guarantee on products against fungal and insect attack, and on colorfastness and stain resistance.

Insect attack. Enhanced resistance to stains and fading.

EASE OF MAINTENANCE

Clean with a broom and detergent-free water. The protective polyethylene coating ensures the preservation of the natural color, look and feel of our products over time.

BIO-SOURCED PRODUCTS

Our products are made of 95% recycled waste—100% FSC®-certified wood sawdust and used plastics—thus contributing to resource conservation and environmental protection.

INNOVATIVE TOOLS

NEED SAMPLES?

Unsure about choosing between different colors or models? Order the samples of your choice online, and you'll receive them at your doorstep in less than 48 hours.

DECKING

EXOTICS

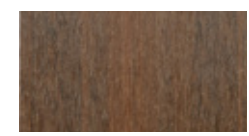

Sublimate your deck with EXOTICS boards and their faithful reproduction of the Ipe shades. Its subtle nuances of color are delicately recreated thanks to a unique manufacturing process. The board's fine polychromatic texture perfectly imitates the look of natural wood.

Coextrusion technology protects the board from stains and fading, and offers enhanced UV resistance. Each board is available in 2 faces a total of 3 colors: RED, YELLOW, BROWN. The random mix of these colors, together with the RED on each board, guarantees an effect faithful to IPE.

HARMONY

HARMONY composite decking boards feature the new Hardcarp co-extrusion and protection technology to enhance the protection against impact and staining.

They imitate the texture of exotic woods as closely as possible, with 2 useful faces. One imitates the grain of the wood, the other is smoother like an exotic wood. Furthermore, the textured side scores 12 in the slipperiness test, depending on the defined orientation.

Installation is carried out using Cobra[®] 8-18 removable clips. Finishes can be with the fascia boards HARMONY.

PREMIUM

PREMIUM boards are co-extruded. This means that the wood composite board is enveloped with a protective polymer layer that also carries the color in a randomly applied pattern. This layer is brushed for a warm and natural finish.

PREMIUM boards are impervious to insect and termite attack, and are guaranteed for 20 years against fading and staining.

To ensure their rigidity, the boards must be fitted with aluminum reinforcements.

CLARITY

The CLARITY frosted glass insert is 8mm thick and can be combined with composite or aluminum boards to create modern, and elegant filter panels.

It replaces three fence boards.

INSERT CLARITY
FD1219

GATES

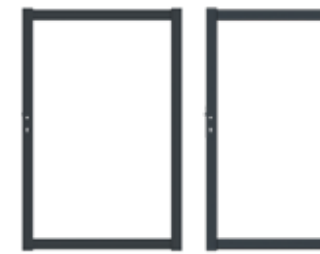

The GATES can be easily matched to the style of your BOSTON fence, thanks to the fill-in-the-blank frames.

Two sizes are available, with maximum widths of 980mm and 1200mm, adjustable as required by cutting the horizontal crosspieces. Universal, these frames are suitable for left or right-hand opening, pull or push.

The lock is directly included in the frame amount on delivery.

For a perfect finish, we recommend an 1830mm battue. Installation can be free-standing within the fence, using 90x90mm posts, or on an existing wall or pillar with hinges.

The hardware includes a stop with adaptable strike, handles, cylinders and sashes.

ANGLE KIT FOR POSTS

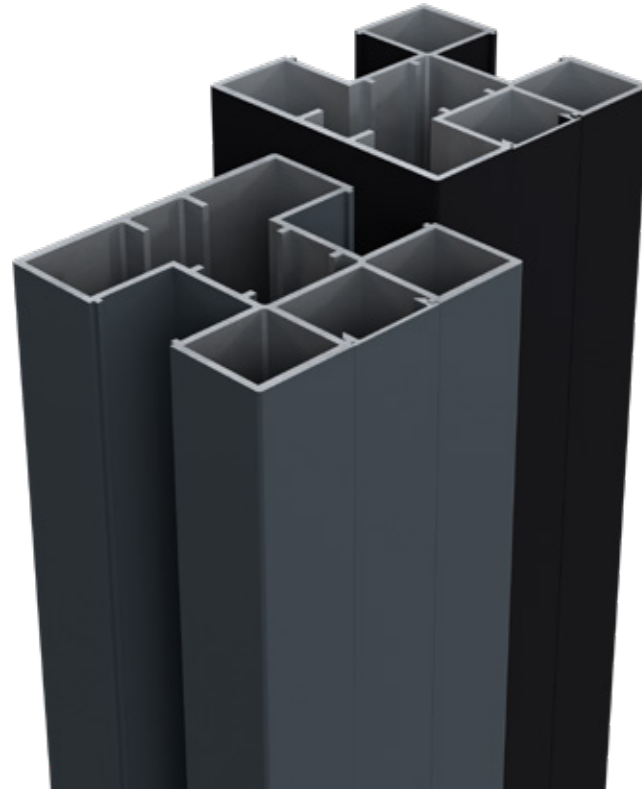

The angle kit specially developed for the BOSTON concept allows you to give any angle from 10° to 170° to the design of your fence. It consists of a pivot pin that fits into one of the post's grooves, and a pivot that provides the desired angle.

The pivoting part holds the boards like a conventional post. The BOSTON fence adapts perfectly to any site configuration.
